

# Custom Designed Brushes

If you require a special twisted wire brush or other unique brush, we'll design it for you and make it from any material the job calls for. Mill-Rose has designed more than 100,000 special brushes with unique configurations for unique applications.

Put our 90+ years of brush design/manufacturing experience to work for you. Perhaps one of the brushes in the photo is similar to the brush you require. Call or e-mail us what you want to accomplish, or send us a sketch showing what you need. Our full-service engineering department will take it from there.
