FOR IMMEDIATE RELEASE - May 17, 2024

## **The Mill-Rose Company Breaks Ground on Expansion**

The Mill-Rose Company, the world’s leading manufacturer of twisted-wire brushes, recently broke ground on an expansion project that will add 32,000 sq. ft. of warehouse and production space to its 70,000 sq. ft. Clean-Fit Products’ facility in Mentor, Ohio.

The groundbreaking follows a recent 5,000 sq. ft. expansion of the company’s production facility in 2023 and will increase overall production/warehousing space to 105,000 sq. ft., creating a state-of-the-art distribution center. The expansion is scheduled for completion in late Fall of 2024 and will be fully operational in 2025.

“Expanding our operations allows us to make necessary investments in equipment and warehousing technologies that translate to Mill-Rose better servicing our loyal

customer base,” said Greg Miller. “With Mill-Rose Laboratories and Clean-Fit under one roof, Mill-Rose Industrial just down the road, plus our Mexico and Texas facilities, we have more than 200,000 square feet of production space.” added Miller.

Mill-Rose has experienced significant growth from its humble beginnings in 1919, and today operates manufacturing and warehouse facilities throughout the United States and Mexico. Strong demand for Mill-Rose brushes, abrasives, PTFE sealants and specialty tools, including Blue Monster® professional-grade products, has fostered the company’s expansion. In recent years, Clean-Fit Products has experienced explosive growth with its Blue Monster® product line, demonstrating the need for high-quality chemical products, brushes and accessories with a unique and trusted brand name.

### **About The Mill-Rose Company**

The Mill-Rose Company is the largest U.S. manufacturer of twisted-in-wire brushes used in virtually every type of industry throughout the world. Mill-Rose is a family-owned organization, now in its fourth generation. Mill-Rose experienced significant growth from its modest beginning in 1919, and today operates manufacturing and warehouse facilities throughout the United States and Mexico with over 200,000 sq. ft. of production. Mill-Rose facilities feature the latest in manufacturing techniques and quality-control programs.
